

# SHIELD for SMBs

## Security Holistic Intelligence and External Layer Defense

Safeguard your Small & Medium Business from cyber threats with the precision and efficiency of OCD Tech. Security tailored to your business, provided by SMB specialists.

OCD Tech provides a cybersecurity solution tailored to safeguard small and medium sized business. This enables businesses to detect and address vulnerabilities in their digital infrastructure without requiring an in-house cybersecurity team. By utilizing cutting-edge scanners, IoT search engines, and open-source intelligence tools, OCD Tech conducts routine vulnerability assessments to uncover possible threats in their networks, empowering SMBs to proactively secure their data.

		BRONZE	SILVER	GOLD
<b>Ports &amp; Services</b>	Continuous, behind-the-scenes monitoring to enhance your network's security and promptly detect potential cyber threats.	X	X	X
<b>Dark Web</b>	We offer proactive protection by monitoring the presence of your information on the Dark Web.	X	X	X
<b>Domain Doppelganger</b>	Supplementary monitoring of both the clear and dark web to detect domains that may impersonate your domain.	X	X	X
<b>DNS Records</b>	We oversee DNS records for unauthorized alterations that may redirect your website or email to an incorrect destination.	X	X	X
<b>Websites</b>	We vigilantly monitor your website for possible disruptions to guarantee its visibility to your customers.	X	X	X
<b>Network Scanning</b>	Regular scans are conducted to detect vulnerabilities in your internet-facing network and assist in resolving issues before cybercriminals exploit them.	X	X	X
<b>Cybersecurity Training</b>	We provide continuous interactive email training for your team to simulate phishing attacks, ensuring they are consistently ready to identify and prevent potential threats.		X	X
<b>Automated Pentesting</b>	We mimic cybercriminals to test your network defenses, uncovering vulnerabilities before they are exploited.			X
